

Deepblu Introduces Dive Booking Feature

Company Launches Service that Offers a Whole New Experience in Dive Trip Planning

TAIPEI, March 2018 – Today, Deepblu has announced brand new ways for divers to discover their next destination on Planet Deepblu. With the company's latest release, divers can now book, manage, and communicate with dive businesses before, during, and after their trip, all in one place.

On Planet Deepblu, virtually all popular global dive locations are placed on a fully interactive interface, allowing users to browse ratings, navigate reviews, and find out more about dive spots than previously available. Now, dive businesses have this tool at their disposal for free.

With tens of thousands of divers already having dive sites at their fingertips, Deepblu has pushed the envelope even further, and will now offer fully interactive dive trip planning and communication between diver and business on the platform. Businesses can now present their services, be seen, and run specials that make them stand out. Trip categories, dive experiences, amenities, and extras can be offered with the click of a button, and potential customers can message each business with the knowledge that they're on a secure platform designed specifically to cater to the needs of divers.

"Planet Deepblu's goal is to help divers simplify their dive trip planning and booking process so they can spend less time planning their dives and have more time on enjoying their dive experiences. The initial roll out of dive experiences is focused on the North American market with service providers concentrated in the Caribbean, Florida Keys, and Mexico which will eventually expand to all dive destinations worldwide," said James Tsuei, CEO of Deepblu.

The new, expanded Planet Deepblu allows divers to select dates, find pricing, set up, and book all in one place. As it has been from the start, divers can locate their favorite dive countries, regions, and spots through the platform, and now when they see businesses in their chosen area they will have easy access to services offered. If you're a beginner looking for a certification course, an advanced diver seeking a new cave dive, or anything in-between, you're sure to find it on Planet Deepblu.
